

ELDER
ENGINEERING (HERTS) LTD

Who are Elder...

Elder Engineering (Herts) Ltd was formed in 1980 as a privately owned company to supply engineering plastic materials in semi finished stock shapes. The range quickly developed to include Industrial and High Performance advanced plastics enabling Elder's customers to purchase today's complete range of materials from one source.

New innovations including PTFE and UHMWP with adhesive led to the introduction of high performance adhesive tapes and high quality silicone rubber and sponge products.

It was a natural progression for Elder to supply customers with finished components to their drawings. The high level of technical expertise at Elder coupled with our own design

capabilities means that we can make a contribution to the solution of your technical problems. In the last three years Elder progressed into machining metal components due to increase demand from our customer base.

Elder, has certification to AS9100 Rev D and BS EN ISO 9001:2015 and in addition, many individual company approvals have been attained. This ensures that quality and service at a competitive price remains the constant priority.

Today, Elder is a leading manufacturer of precision engineered parts and components in Metals and Plastics, with divisions consisting of High Performance Tapes, sponge and Rubber, and X-Ray test pieces.

How we help our customers

By providing components that are always finished and tailored to your requirements whether cut, milled, turned or routed, using our CNC equipment you can be assured that Elder Engineering can provide parts not only in a range of materials but also to the highest standards.

High Precision Metal Components can be produced from our CNC Mills, CNC lathes, CNC Routers and assembly department. We do not have any cross contamination due to a dedicated 5 Axis and CNC Lathes to machining metals.

High Performance Tapes and Gaskets, stocked as master logs for ease of conversion, our in-house converting gives Elder the flexibility of providing customers with exactly what they need without high MOQs. Supplied to many industries including Aerospace, Medical, food and flame spray industries.

Elder Engineering (Herts) Ltd are certified to AS9100 Rev D along with many individual company approvals. Our priority is focused on quality and service at competitive prices, be they in the Food Packaging, Aerospace, Medical, Printing or any other industry.

High Precision CNC Machining

Elder Engineering offer a competitive machine part service. A complete range of machining processes can be offered from 5 axis work right through to assembly. Every part is machined to the highest standards. Quality and delivery are what we pride ourselves on.

If you have a part or drawing in Metal or Plastic we will be happy to produce a quotation for you.

For our full plant list and capabilities, please visit our website
